- [Upstate's Uneven Metropolitan Economies – Implications for Policy Makers](#) - The story of New York's job market since the 1990's has been a tale of two regions. The New York City metropolitan area, where two-thirds of the state's population lives, has seen private sector employment growth (42.4%) that is near the national rate (48.3%). Albany-Schenectady-Troy's employment growth – 27.5% - is much
- [Traded Employment Losses Since 2001 in Upstate New York](#) - Metropolitan areas in Central and Western New York, like others in the Rust Belt that had high concentrations of manufacturing employment, have been hit hard by the loss of manufacturing jobs. Ninety-one thousand net manufacturing jobs were lost in the 2001-2010 decade in five upstate metropolitan areas – Utica-Rome, Syracuse,
- [Nexgen in Syracuse – Throwing Good Money after Bad?](#) - Update: Note that the Syracuse Post Standard carried the following article on January 4th: http://www.syracuse.com/business-news/index.ssf/2018/01/ny_taxpayers_built_90m_factory_in_dewitt_for_firm_that_walked_away_didnt_create.html The article quotes ESD spokesman Jason Conwell. "Conwall said the grant will be contingent on the company meeting its job commitments. Details of the grant's terms will not be available until the grant disbursement agreement is executed
- [Data, Key Punches, Blogging and the Upstate Economy](#) - Fifty years ago, as a research assistant in graduate school at Syracuse University, I did some quantitative research for a professor on the effect of various factors on state policy outputs. Doing the work required me find data in books in the university library and to

go to a room in

- [Left Behind: Characteristics of Low Labor Participation Counties](#) - In my last post, I examined labor market participation in New York State counties. I found that most New Yorkers, both upstate and downstate, live in counties where labor market participation differs only slightly from national levels, but upstate counties with small populations in many cases have labor participation rates
- [Left Behind: Missing from the Labor Market in New York State](#) - A reader of this blog recently wrote, "We know that labor force participation rates across the country have declined noticeably for a number of years, and many economists have warned of the troubling implications of this. Such rates across Upstate NY have declined as well, and in most cases are significantly below the national average
- [School Segregation is Increasing in New York's Cities and Suburbs](#) - Recent articles in the New York Times and The Nation have focused on efforts to resegregate schools in the South, by carving new predominantly white school districts out of larger county-wide school districts that are predominantly black and Hispanic. The articles examined a recent federal court decision that permitted the creation
- [President Trump to Upstate Residents: Move to Wisconsin](#) - Recently, in an interview with the Wall Street Journal, President Trump suggested that upstate New York residents should leave the state for Wisconsin, where a new Foxconn LCD display panel manufacturing plant will be located, creating at least 3,000 jobs. President Trump said, "I said, you know, Gary, you go to
- [More Regional Diversity but a Larger Racial/Ethnic Divide in New York Schools](#) - This post examines changes in the ethnic and racial compositions of kindergarten through twelfth grade schools in New York State metropolitan areas over the past 25 years. During that

period, the student population, like the general population has become more diverse, with the percentage of students identified as white decreasing,

- [The Income Gap between Men and Women: 2015 vs. 1970](#) - Since 1970, inflation adjusted wage income growth has been almost nonexistent - only five percent over the 45 year period ending in 2015. Income change in metropolitan areas in New York State has differed little from the nation. Rochester and Buffalo were two exceptions - both had lower median real wage
- [The Persistent Gap Between White and Black Incomes in New York](#) - There has long been a substantial gap between the incomes of white Americans and those who describe themselves as African/American or black. As early as 1964, with the enactment of the Civil Rights Act, the Federal and state Governments began passing laws aimed at preventing discrimination in the workplace. Has New York seen
- [Education, Age and Declines in Real Income Since 1970](#) - The economic malaise that has affected small and medium sized rust belt cities since 2000 has been widely noted. Most have seen little or no real household income growth since then. Much of the weak performance has been associated with the long-term decline of manufacturing employment in the region -
- [Response to Lost Manufacturing Jobs – The Effects of Imports and Increased Productivity](#) - I'd like to thank Kay Wilkie, who serves on the United States Trade Representative's Intergovernmental Policy Advisory Committee for offering useful comments concerning my post, "Lost Manufacturing Jobs – The Effects of Imports and Increased Productivity" Kay points out that "It would be worthwhile to carefully examine and review the aspects
- [Lost Manufacturing Jobs – The Effects of Imports and Increased Productivity](#) - The decline in manufacturing employment in the United States has caused a wrenching

economic adjustment, as one path to relatively well paying jobs has narrowed, particularly for workers without college educations. As the percentage of workers in our society who work in manufacturing industries decreases, and lower paying service employment

- [As Private Sector Employee Incomes Stagnate, Local Government Workers Prosper](#) - The slow growth of worker incomes since 2000 has been the subject of intense policy and political debates. One of the clear messages of the 2012 Presidential campaign was the call to remedy perceived distortions in world trade that have disadvantaged American workers, particularly those had in the past held
